For a good testing procedure, is important that the mix reach a good equilibrium of chemical, physical and viscosity features; for this reason , wait 3 hours before testing product. After this period, start with test on bulk, following the QC protocol, approved from company. If the batch pass all tests, proceed with packaging.

PRODUCT NAME

SHAMPOO S2 RISTRUTTURANTE 250 ml

The objective of this stability report is to ensure that product maintains its intended physical, chemical and microbiological quality, as well as functionally and aesthetics when stored under appropriate conditions. The features and the results of study protocol are specified in document relative to "Physical, Chemical and Microbiological Specifics".

STABILITY

The product contains water. They were used preservatives to warranty the storage for 30 months from the date of the production batch. The added ingredients were carefully evaluated to ensure the efficiency when stored under appropriate conditions and in original packaging, without opening.

STABILITY TEST

This product passed all stability tests, performed in the factory, according to internal test protocol. During tests, the products are put under conditions that can accelerate all phenomena of not stability. At the end of stability tests the product is evacuated for the potential interactions between product and the packaging that might occur during Thermo-Shock Test.

HEAT-SHOCK TEST

The aim of this test is to accelerate, the most is possible, the phenomena of "aging" of cosmetic product, for discovering any not stability in a short time. Product, in his final packaging, has been stored at room temperature for 24 hours, after, it has been stored at -10°C for 24 hours, after, put in professional heater for creams, emulsions, shampoos, lotions, styling waxes for 24 hours; at the end, stored at room temperature after this Heat-Shock Cycle, all eventual modifications have been evaluate and compared with a sample, stored always at room temperature and considered as the referring sample. The Heat-shock Test is repeated on the same sample for three cycles.

COMPATIBILITY CONTENT/ BOX

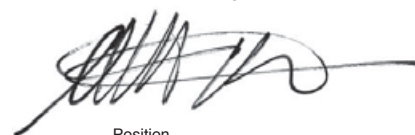

After Heat Shock Cycle have been evaluated all phenomena on packaging such as:

- increased weakness
- broken areas
- deformations
- change of color and transparence
- change of permeability
- loss of product
- problems with product exit
- label deformation or lowering of coloration
- blockage of opening system
- color transfer from product to packaging

Conclusion: this product, under all stability simulations, doesn't showed any change that induced to change formulation or packaging or labeling or production cycle. It is stable when stored and handled under appropriate conditions. PAO IS 12 MONTHS.

**DYED OR BLEACHED
DAMAGED HAIR**

250 ml e
8,45 fl.oz.

DESCRIZIONE: SHAMPOO KÉDAN RISTRUTTURANTE, ideale per ristrutturare e tonificare i capelli stressati da agenti atmosferici e dai trattamenti chimici. La keratina agisce dalla radice rinforzando la struttura dello stelo. L'olio di Argan, ricco di Vitamine A, E ed F, apporta sostegno nutritivo dalla radice alle punte dei capelli.

DESCRIPTION: KÉDAN RESTRUCTURING SHAMPOO, ideal to restore and tonify stressed hair from weathering and chemical treatments. Keratin acts from the root reinforcing the structure of the stem. Argan Oil, rich in Vitamins A, E and F, brings nutritional support from the roots to the hair tips.

MODO D'USO: Applicare sulla cute e sui capelli bagnati. Massaggiare e risciacquare accuratamente. Ripetere l'operazione se necessario.

HOW TO USE: Apply to wet hair and rub gently letting it soak for a while. Rinse thoroughly. Repeat if necessary.
